LISTE DES NOMS CONTENUS

DANS

L'ATLAS DU MONDE ANCIEN,

DOUZE CARTES POUR SERVIR À L'ÉTUDE DE L'HISTOIRE ANCIENNE

PAR

H. KIEPERT.

BERLIN, DIETRICH REIMER, ÉDITEUR. (HOEFER & VOHSEN).

La liste suivante contient tous les anciens noms géographiques contenus dans nos cartes; on y a ajouté l'indication de ce qu'ils désignent: pays, peuple, ville, fleuve ou montagne, et pour tous les cas où le renseignement était désirable les noms modernes et non-classiques. Les chiffres renvoient au numéro de la carte, et les lettres aux lettres placées dans la marge des cartes. Quant aux noms figurant plusieurs fois dans l'Atlas, le lecteur n'est renvoyé qu'à la carte où ils se trouvent avec le plus de détails; de là il sera toujours facile de se reporter aux cartes moins détaillées. Les détails purement topographiques de la carte IX, qui contient les plans de Rome à diverses époques, n'ayant rien de commun avec les détails strictement géographiques des autres cartes, ont été rejetés à la fin et rassemblés dans un Index spécial. Nous ajoutons maintenant quelques mots pour expliquer certaines dispositions qui pourraient n'être pas assez claires d'elles-mêmes.

Les noms que nous rencontrons dans chacune des deux littératures classiques, à l'exception toutefois des noms du Nouveau Testament, sont imprimés en caractères ordinaires. Ceux au contraire qui n'ont pas traversé le grec ou le latin et qui proviennent directement d'une autre source (sanscrite, bactrienne, anc. persane, arménienne, assyrienne, syriaque, hébraïque, phénicienne, égyptienne, étrusque) sont écrits en caractères lapidaires.

Les abréviations topographiques, telles que l'usage les a consacrées, sont latines, par égard à la rédaction des cartes auxquelles elles renvoient; la lecture n'en sera que plus facile au public étranger. Pour les lieux habités, nous ne les avons pas spécifiés comme étant habités, sauf deux cas: 1º quand il était nécessaire de les distinguer d'une île, d'une montagne, d'un fieuve qui portent le même nom, et 2º quand il s'agissait de colonies fondées par un peuple à de lointaines distances de son lieu d'origine (p. e. op. Gr. signifie oppidum graecum). Les appellations synonymes sont mises entre parenthèse

ou réunies par la lettre s. (sive); v. ne signifiera donc pas vel, mais vide et renverra à d'autres articles.

Les abréviations de noms de pays nécessaires pour préciser la situation des localités ont à peine besoin d'être expliquées. Quand un même nom désigne toute une vaste étendue de territoire, comme Ariana, Graecia, Italia, Gallia, nous l'avons fait suivre entre parenthèse du nom qui désigne la partie de ce territoire à laquelle devra se reporter le lecteur. Quand au contraire il n'y a pas de parenthèse, deux ou plusieurs noms de cette espèce qui se suivent rappellent que les localités désignées appartenaient à la fois à deux ou plusieurs régions. S'il s'agit d'une chaîne de montagnes ou d'un grand fleuve la chose est assez claire de soi-même. S'il s'agit de lieux habités, c'est que les témoignages classiques ne s'accordent pas à les placer dans une seule et même région, ou bien encore que, dans la suite de l'histoire, la politique a déplacé les frontières mêmes de la région. L'indication Gall. Germ. voudra donc dire que la localité désignée se trouve sur la frontière indécise de l'une et de l'autre région, ou bien que, selon les époques, elle a fait partie tantôt de la Gaule et tantôt de la Germanie. Mais l'indication Gall. (Germ). désignera dans la grande province romaine des Gaules cette province plus petite qui porta depuis Auguste le nom de Germanie cisrhénane ou, depuis Claude, ceux de Germanie supérieure et inférieure. La lettre i. placée immédiament après le nom principal indique que le nom est celui d'une île; la même lettre entre parenthèse (insulae, gén.) signifie que la localité est située dans l'île dont le nom suit.

Toutes les indications relatives aux appellations modernes de lieux anciens, ou plus exactement à leur appellation post-classique sont imprimées en caractères italiques. Les lieux aujourd'hui déserts ou tombés en ruines sont signalés par l'abréviation rud. (rudera); et, comme en beaucoup de cas on n'en peut indiquer l'emplacement

que d'une manière approximative et par la mention des localités avoisinantes, souvent l'abréviation rud. est suivie de l'abréviation j. (justa) ou pr. (prope). Quant à ces appellations, d'ailleurs assez nombreuses, qui comme en italien Cività, Castelvecchio, en grec moderne Palaeókastron, en turc Eski-kalé, Ören- ou Viran-chehr, en arabe Khirbé, Kharaba et autres semblables, ne sont rien de plus que les expressions modernes signifiant ville, château fort ou ruine, nous les avons omises, comme de peu d'importance. Pour distinguer de noms employés encore aujourd'hui et auxquels la conservation totale ou peu altérée des noms anciens correspondants a donné quelque intérêt historique, ceux que l'érudition et un intérêt patriotique pour l'antiquité chez les Grecs modernes, les Italiens et les Espagnols ont rétablis dans leur forme primitive, nous avons cru devoir mettre ces derniers entre crochets [].

Nous avons adopté pour tous les noms appartenant aux langues, qui ne se servent pas de notre alphabet, un système de transcription conforme à leur prononciation vraie dans les langues originales. Les anomalies inévitables dans un texte destiné à l'usage de lecteurs de plusieurs nations, se réduisent en ce qui regarde l'orthographe française pour les consonnes à conserver l'allemand sch et tsch pour le français ch et tch et à l'usage absolu du g pour le français gu devant e et i. Pour les voyelles le français ou, u, eu est exprimé comme en allemand par u, ü, ö; la quantité des syllabes et l'accent tonique ne sont marqués que dans les cas douteux. Cependant nous avons fait exception pour les noms de l'Ancien Testament (voyez Carte III) que l'on retrouvera tels qu'ils ont été consacrés par l'usage de traductions nombr avons conservés, si

différents qu'ils soient de la prononciation hébraïque réelle, pour la plus grande commodité de la pratique scolaire et particulièrement de la pratique scolaire allemande. Dans cette manière d'écrire et de prononcer, médiocrement conforme aux règles de la saine philologie, l'altération porte surtout sur les siffiantes sémitiques 1, D, W, W, dont les équivalents rigoureux, z, s, sch, sont uniformément rendus dans les versions allemandes par la seule lettre s. Au contraire dans la même version le 2 hébreu (c) est transcrit contre toute rigueur par le z, (ts selon la prononciation allemande); de sorte que le z et le s ont dans la transcription allemande une valeur précisement inverse de celle qu'ils devraient avoir, comme il est facile de s'en convaincre par une simple comparaison de mots. Cependant pour le son sch que la plupart des traductions rendent simplement par s, comme quelques traductions, ainsi celle du rituel anglican, maintiennent une distinction et le rendent par sh, il nous a paru convenable dans les noms hébreux de le rendre au moins par un s marqué d'un accent. Dans les autres noms nous avons conservé le sch.

La quantité des voyelles n'est indiquée que dans les cas d'incertitude possible. Le fait que ceci a lieu dans les différents genres d'écriture au moyen de divers signes orthographe (trait horizontal [-] et circonflexe [^]) n'a de raison d'être que dans la convenance typographique. Quant à l'accent tonique indépendant de la quantité des syllabes, il n'a été donné que pour les noms modernes que l'on entend souvent prononcer incorrectement.

Pour aider nos lecteurs peu exercés nous ajoutons une liste alphabétique dont le but est de leur donner la clef des abréviations de noms de pays.
